## programming languages

Heart Dart, C#, JavaScript,  
VB.NET, Java

## software

Flutter, .NET, AWS, Firebase,  
DevOps, Oracle PS/SQL, Node  
JS

## SUMMARY

I am an innovative and proactive Systems Engineer with more than six years of experience, I have developed a range of mobile, desktop, and web applications, showcasing my strong empathy for programming and eagerness to learn new technologies.

I am known for my problem solving skills and the ability to work collaboratively with others, which has helped me to deliver successful projects. In addition, my fluency in English enables me to access a wealth of information and continuously update my skills to stay up-to-date with the latest trends in the industry.

## experience

2022–Currently

### Gorilla Logic

*Senior Flutter Developer*

Remote

- Designing, developing, and maintaining widgets for iOS and Android platforms using the Flutter framework.
- Collaborating with cross-functional teams, including product and design, to ensure that the application meets business requirements and delivers an exceptional user experience.
- Conducting thorough testing and debugging to ensure that the application is free of defects before release.
- Integrating the application with the server-side infrastructure in collaboration with the back-end development team.
- Helping to train and mentor other developers in the company to ensure consistent adherence to development practices

2021–2022

### Amaris Consulting

*Experienced Consultant*

Remote

- Designed and developed and maintained the **Leal App** for iOS and Android platforms using the Flutter framework.
- Collaborated with cross-functional teams, including product and design, to ensure that the application meets business requirements and delivers an exceptional user experience.
- Integrated the application with the server-side infrastructure in collaboration with the back-end development team.

2020–2021

### Capgemini

*Senior Software Engineer*

Remote

- Worked on the creation of the **Bancolombia**'s internal Design System, including developing a shared design language, creating UI components, and documenting design guidelines.
- Used the company design system to implement complex user interfaces and animations to create a seamless user experience in the **Bancolombia Ahorro a La Mano** app.
- Researched and implemented new technologies, frameworks, and development practices to improve the application's performance, scalability, and user experience.

Node JS

2020–2020

**RENTEC Rentabilidad y Tecnología SAS**  
*Software Engineer*

Remote

- Developed and maintained MVC pages, including views, controllers, and models, to provide a seamless user experience using the .NET framework.
- Developed and maintained database systems using SQL Server and other database technologies.
- Conducted thorough testing and debugging to ensure that applications were free of defects before release.
- Participated in code reviews and provided feedback to other developers to improve code quality and maintainability.

2019–2021

**IncubApp**  
*FrontEnd developer*

Santander, Colombia

- Developed the screens, navigation and interaction of the application in the Flutter framework (Dart) based on the designs of the UX / UI graphic design team.
- Created the functionality for the integration of AWS services such as Cognito and Lambda functions.

2018–2020

**Sistemas y Computadores S.A.**  
*Component Innovation Engineer*

Santander, Colombia

- Designed and developed web applications and desktop applications using the .NET framework and Oracle database technologies.
- Created and implemented complex database queries and stored procedures in Oracle to extract and manipulate data.
- Developed and maintained web applications and desktop applications using C and other .NET languages.
- Worked with clients to gather and analyze business requirements and translate them into technical specifications.

## education

2011–2017

**Systems Engineer**

Universidad Industrial de Santander

2010

**High school diploma**

Institución Educativa "Las Américas"

## extracurricular

2016 - 2017

**Barista, Dishwasher, Ice cream server, Groundskeeper**

Sheri's Sweet Shoppe

During my two summer cultural exchange program in Winthrop, Washington, I enhanced my English language skills by interacting with customers in a dynamic service environment. This experience not only improved my language proficiency but also broadened my understanding of American culture and enhanced my adaptability and independence.

## interests

**Technologies:** ReactJS. NodeJS, Video games development.
