Daniel Villamizar

Senior Mobile Engineer | Flutter, Dart, Rust, React | Design Systems & Local-first Apps | Claude Certified Architect

Colombia (Remote, UTC−5) · danieljosevillamizar@gmail.com · linkedin.com/in/danielvillamizar94 · github.com/Spiro94 · danielvillamizar.dev

SUMMARY

Senior Mobile Engineer with 8+ years of experience building cross-platform products with Flutter and Dart for banking, auto finance, loyalty and consumer brands, including Bancolombia, Byrider and Panasonic (Yohana). Redesigned and migrated Byrider's customer app from Xamarin to Flutter for 50K+ customers, built components for Bancolombia's enterprise design system, and developed a local-first Rust core (Axum, Actix Web, Tauri) shared across mobile and desktop. Claude Certified Architect (Anthropic) shipping production AI features with Claude and OpenAI.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Bloc, iOS, Android, App Store & Google Play releases, TestFlight

Languages: Dart, TypeScript, JavaScript, Rust, C#, SQL, Java

Web & Backend: React, Node.js, .NET (MVC, WCF), Rust (Axum, Actix Web, Tauri), REST APIs

Cloud & Data: AWS (Cognito, Lambda), Google Cloud, Firebase, Supabase, PostgreSQL, SQL Server, Oracle PL/SQL

AI: Claude, OpenAI, Google ADK, LLM integrations, OCR and voice pipelines

Practices: Design Systems, Clean Architecture, Code Review, Mentoring, Agile/Scrum

PROFESSIONAL EXPERIENCE

Gorilla Logic — Senior Software Engineer (Mobile & Rust) 2022 – Present

Remote

- Redesigned and migrated Byrider's customer app (MyByrider) from Xamarin to Flutter, used by 50K+ customers to manage auto loans, make payments and set up autopay on iOS and Android.
- Built Flutter features for Yohana (Panasonic), a family concierge app, integrating AI services (OpenAI, Claude, Google ADK) on Google Cloud.
- Developed a local-first core library in Rust (Axum, Actix Web) and packaged it into cross-platform desktop apps with Tauri, sharing business logic across mobile and desktop.
- Mentored developers on Flutter architecture and code review practices, working closely with product, design and backend teams.

Amaris Consulting — Senior Flutter Engineer (Consultant) 2021 – 2022

Remote · Client: Leal

- Designed, built and maintained the Leal loyalty app for iOS and Android with Flutter and Firebase, where users earn points and cashback from in-store purchases.
- Integrated the app with backend services together with the server-side team, and refined requirements with product and design.

Capgemini — Senior Software Engineer 2020 – 2021

Remote · Client: Bancolombia

- Built reusable UI components, a shared design language and documented guidelines for Bancolombia's enterprise design system, used across multiple product teams.
- Implemented complex interfaces and animations for Ahorro a la Mano, Bancolombia's fee-free, 100% mobile savings account.
- Evaluated and introduced new frameworks and practices to improve app performance and scalability.

RENTEC Rentabilidad y Tecnología — Software Engineer 2020
Remote

- Developed .NET MVC web features and SQL Server database logic, and took part in code reviews to improve maintainability.

IncubApp — Mobile Developer (Flutter) 2019 – 2021
Bucaramanga, Colombia

- Built screens, navigation and interactions in Flutter from UX/UI designs.
- Integrated AWS Cognito authentication and AWS Lambda functions.

Sistemas y Computadores S.A. — Software Engineer (.NET) 2018 – 2020
Bucaramanga, Colombia

- Built web and desktop applications with .NET and Oracle, including complex PL/SQL queries and stored procedures.
- Gathered business requirements with clients and translated them into technical specifications.

INDEPENDENT PROJECTS

Founder & Mobile Engineer — Habit Heroes, CitaMente, Cuentitos Present

- Designed, built and operate three apps in closed beta on Google Play and TestFlight (Flutter, Bloc, Supabase, PostgreSQL).
- Shipped AI features end to end: voice recording, photo OCR and structured data extraction for medical appointments (CitaMente), and AI-generated children's stories (Cuentitos), using OpenAI.
- Own the full lifecycle: product design, backend, store submissions and post-launch support.
